NORTH GARDEN STREET PROJECT UPDATE #4

Week of May 11:

- The Contractor has completed the sanitary sewer main installation between Doughy Street and Woodburn Street.
- The Contractor will complete the watermain installation between Doughy Street and Woodburn Street by the end of the day on Friday.

Week of May 18:

- The Contractor plans to reconstruct the intersection at Woodburn Street. This will include the sanitary sewer, watermain, and deep storm sewer. They will also be working around a large electric duct that crosses the intersection. The Contractor anticipates that this effort will take the full week. Please plan your travels accordingly.
- A second construction crew is planned to arrive mid-week next week.
 - The second crew plans to reconstruct the sanitary sewer services between Doughy Street and Woodburn Street from the main to the property line.
 - The second crew plans to reconstruct the water services between Doughy Street and Woodburn Street from the main to the property line after the main passes the required testing protocols.

Project Notes:

- Thank you to everyone along the project for your continued attention to project safety in the work zone.
- If you have any kind of issue with your water service, now or at any time during the project, please contact Rob Coughlin right away. Some residents have the Contractor's phone number. Please feel free to call the Contractor as well.
- *****Residents currently connected to temporary water service are encouraged to let their water run briefly before using it, especially during warm and sunny weather. Temporary water lines may warm up when exposed to direct sunlight, which can cause the water from the faucet to be unexpectedly hot when you first turn it on. Running the water for a short time will help clear the warmed water from the line and bring in cooler water.*****
